Summary

I am a seasoned Full Stack/Generative AI & Mobile-App Developer, well-versed in crafting robust backends and possessing a profound understanding of web application architecture. My expertise spans Application Setup, Project Structure, Technology Stack, and Database Design. I also thrive in working across a versatile range of frontend technologies and Mobile Application, seamlessly bringing concepts to fruition.

Throughout my career, I've actively contributed In diverse industries like eCommerce, communication, travel, education, fashion, fintech, and automotive, I've worked on impactful projects, such as:
- Crafted a digital networking platform featuring dynamic QR codes, theme customization, domain management, and analytics
- Launched a platform offering creative prompts across different industries
- An Uber-style long-distance rental web and mobile application
- A FinTech web and mobile application facilitating loan applications and approvals
- Developed a direct voice call feature for users to connect with a center's receptionist via a website
- The development of an OTT platform
- Crafted an intuitive location-based geofencing multi-store e-commerce application
- Constructing a feature-rich real estate web application

My development toolkit encompasses a comprehensive array of technologies, allowing me to tackle any challenge that comes my way. I'm particularly skilled in Full Stack development, specializing in PostgreSQL in conjunction with NestJS for backend development, and harnessing NextJS with ChakraUI or Tailwind CSS for frontend endeavors. My proficiency extends to mobile application development using Flutter. In addition, I'm well-versed in, JavaScript, TypeScript, Nest.js, Next.js, Flutter, WordPress and Shopify.

My commitment is to ongoing learning and adaptability, enabling me to provide versatile solutions. I specialize in Full Stack development to support various digital requirements.
